

# LAST RITES FOR CHARLES G. GIVEN AT SILVER CITY

Though a Layman, Deceased Possessed Great Understanding of Tuberculosis; Was Physician's Secretary.

(SPECIAL CORRESPONDENCE TO MORNING JOURNAL) Silver City, N. M., May 17.—Silver City paid its last tribute today to Charles G. Given, secretary to the physician-in-chief of the New Mexico Sanatorium, whose funeral was held under the auspices of the city.

The death of Mr. Given, which occurred Sunday night, followed a long illness of some weeks' duration. The body was sent to Philadelphia, his former home, for final interment.

Mr. Given, though but thirty-three years old, was a genius. It is doubtful if there was a man outside the ranks of the medical profession who had made tuberculosis a specialty, better informed on this than Mr. Given, who had devoted the last few years of his life to a close study of the disease.

To him, perhaps more than to any other man in the city, this city owes its prestige as a health resort for persons afflicted with this disease. He was a publicity expert of widespread reputation, and contributed largely to magazines, medical journals and newspapers.

He was a man of unusual magnetism and counted everyone his friend. Until the day of his death he entered actively into the work of the chamber of commerce and directed its advertising propaganda, which he originated several years ago and carried to successful conclusion.

Mr. Given was unmarried and survived by two sisters and his father, living in Philadelphia. Before coming west he was connected with a large trust company in Philadelphia.

His funeral was largely attended and his body was escorted to the train by the Elks. He also belonged to the Masonic lodge, which will conduct his funeral in Philadelphia. A sister, Miss Katherine Given, accompanied the body east.

## Mexican Machinists Strike.

Laredo, Tex., May 17.—A walkout yesterday of Mexican machinists in the shops of the Mexican National railway at Nuevo Laredo, opposite here, assumed serious proportions.

The strike probably would extend to all shops on the national lines. It was said at Nuevo Laredo that trains probably would stop running Thursday. The disrupted condition of the railway stock and demands of men to be paid in cash and not in scribbles of the currency, were said to have caused the walkout.

## Not a Bite of Breakfast Until You Drink Water

Says a glass of hot water and phosphate prevents illness and keeps us fit.

Just as coal, when it burns, leaves behind a certain amount of combustible material in the form of ash, so the food and drink taken day after day leaves in the alimentary canal a certain amount of indigestible material, which if not completely eliminated from the system each day, becomes food for the millions of bacteria which infest the bowels.

From this mass of left-over waste, toxins and poison-like poisons are formed and sucked into the blood. Men and women who can't get feeling right must begin to take hot water. Before eating breakfast each morning drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash out the thirty feet of bowels the previous day's accumulation of poisons and toxins and to keep the entire alimentary canal clean, pure and fresh.

Those who are subject to sick headaches, cold, biliousness, constipation, indigestion, rheumatism, backache, neuralgia, etc., should have a glass of hot water after meals, and begin practicing internal sanitation. This will not cost you a cent, but it is sufficient to make anyone an enthusiast on the subject.

Remember inside bathing is more important than outside bathing. Keep the skin pores do not absorb impurities into the blood, causing poor health, indigestion, etc. Just as soap and hot water cleanses, sweetens and freshens the skin, so hot water and limestone phosphate act on the stomach, liver, kidneys and bowels.

## Home Celebration of Wonder Interest

The arrival of a baby in the household completely changes the entire aspect of the future. But in the meantime, during the anxious period of expectancy, there is a peculiar interest in the mother's health.

# IRREGULARITY IS FEATURE OF DAY ON WALL STREET

Continued Movement of War Shares Results in Sharp Decline; General Electric Is Exception.

(BY MORNING JOURNAL SPECIAL WIRE) New York, May 17.—Irregularity was the dominant feature of today's market, which seemed to be governed almost entirely by speculative considerations or exigencies. Some rumors were again current, but they exerted little more than passing influence. A far more potent factor in the continued selling of international issues, including United States Steel, Wall Street is without direct means of tracing the source of this liquidation, but it bears the marks of foreign origin.

Stocks were under partial restraint at the opening, but without persistent pressure until midday, when most of the specialties and allied issues fell sharply on rumors that threatened a revival of recent international difficulties.

Munitions and motors were at all times variable, when not heavy, the latter scoring extreme recessions of three to eight points, with losses of one to three in the so-called munitions. The one striking exception to the general tendency in the war stock shares was General Electric, which recorded a gain of 3 1/2 on the rise to 170 1/2. Mexicans were firm during the forenoon, but fell away with copper and other metals on increased offerings later. United States Steel was more prominent than yesterday, but its activity was largely at the expense of its strength, closing at practically a point loss.

Aside from reading the tendency of the market downward, United States Steel was the only stock to amount to 710,000 shares.

Bonds were firm. Total sales, par value, aggregated \$1,200,000. United States bonds were unchanged on call.

## CHICAGO BOARD OF TRADE.

Chicago, May 17.—Discussion of peace chances had considerable effect today in bringing about lower quotations on wheat. The market, although steady at the close, was 3/4 to 1/2 to down on wheat, 1 1/2 to 2 on corn, 1 1/2 to 2 on soybeans.

Corn finished 1/4 to 1/2 up, oats unchanged to 1/4 off and provisions varying from the same as yesterday's finish to a decline of 1/4.

Peace talk showed its market influence in the main through the evident restraint put upon buyers. Bears in wheat were disposed to emphasize the opinion that the damage from the Russian fly had about reached the maximum for this season of March wheat to Holland did not seem to arouse the slightest enthusiasm on the bull side.

Corn developed firmness owing to the fact that country offerings were light.

Oats were steadily by export sales of 500,000 bushels at the seaboard. Provisions averaged lower on account of a sharp downturn in the value of hogs. Rallies at times were prompted by rumors of peace and by assertions that 1,500,000 pounds of lard had been disposed of for foreign relief.
